Experience

ARGUSOFT Jul 2023 – Present
Solution Analyst *Gandhinagar, Gujarat*

- Independently spearheaded the migration of core services from Spring Boot 2.x to 3.x, managing Jakarta EE transitions and resolving major dependency conflicts.
- Architected and implemented updated security protocols using Spring Security 6, replacing deprecated WebSecurityConfigurerAdapter with the modern SecurityFilterChain approach.
- Refactored the persistence layer by moving away from Hibernate-specific logic toward native SQL and Spring Data JPA to ensure long-term framework compatibility.
- Designed and deployed 6+ fullstack modules using Java EE, Spring Boot, and jQuery, improving UX and reducing load times by 30%.
- Engineered backend logic and SQL queries to handle large-scale data, reducing API response times by 45%.
- Resolved 50+ real-time issues in production, showcasing engineering ownership and commitment to stability.
